

Proven End-to-End Automation for Financial Institutions

alogent.com

Founded over 25 years ago, Alogent specializes in cutting-edge software solutions that streamline and automate workflows and transaction ecosystems of financial institutions. From community banks and credit unions, to Tier 1 international banks, our advanced platforms are designed to digitize operations and drive efficiency.

At Alogent, we are committed to fostering strong partnerships with our clients, understanding that their success is paramount. Our tailored solution suites empower banks and credit unions to deliver personalized products and services, leveraging data-driven insights for enhanced customer engagement.

Whether your goals include account growth, operational efficiency, cost reduction, improved service levels, or bolstered operational resilience, Alogent offers the strategic answers to meet and exceed these objectives. Our scalable platforms are built to evolve alongside your unique needs, ensuring sustained innovation and competitiveness for years to come.

High-Yield Solutions, a User-Centric Philosophy, and Limitless Growth

Alogent's open architectures and API-based solutions offer tight third-party and core banking integration potential, as well as the ability to integrate with other Alogent solutions. Meet goals effortlessly today and ensure scalability for tomorrow through on-premise and hosted offerings - controlling costs and resources, and allowing you to focus on serving your account holders.

By transforming data into actionable business intelligence, Alogent enables financial institutions to track, archive, and analyze data, and to leverage powerful business insights centrally. Together, our platforms form a seamless digital ecosystem and deliver a consistent user experience regardless of the point-of-presentment or capture device, driving account holder loyalty, expanded business opportunities, and a tangible ROI.

Finalist: Best Consumer Payments Solution

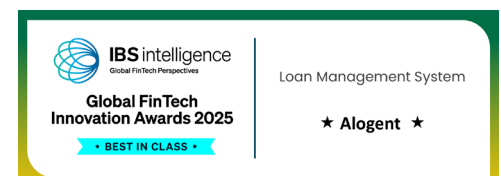

FINALIST

Finalist: Product Innovation, Mobile Banking

FINALIST

Finalist: Product Innovation, FASTdocs, AI Advances

Winner: Best-in-Class Loan Management Solution: AccuAccount

PAYMENT SOLUTIONS SUITE

End-to-End Item Processing and Deposit Automation

Unify is a modern deposits automation platform that addresses all full and self-service channels with a single API, including Day 1 and Day 2 processing. By applying a transaction-level approach rather than by batches, financial institutions speed up item processing regardless of the point of capture. Omni-channel check fraud mitigation capabilities are also inherent to Unify. Deploy by deposit line of business or enterprise-wide, gaining full data transparency across the institution through a single database and centralized reporting dashboard.

In-Branch and Teller Solutions

Automated teller solutions and payment hub integrations for modern, streamlined branch operations.

Remote Deposit Capture

Omni-channel, mobile, merchant capture, ATM/ITM - and all other points of capture from outside the branch.

Back-Office Processing

Straight-through processing supports connectivity to point of presentment applications, internal systems and image archives, along with interbank and payment network exchange endpoints in a reliable, open, and scalable framework.

Omni-Channel Check Fraud Mitigation

Alogent Shield

Embedded within Alogent's item processing suite of solutions, Alogent Shield's comprehensive check fraud mitigation features allow banks and credit unions the ability to detect risky transactions before they reach the back office - in real-time, and at the point-of-presentment. Leverage real-time image and data validations to strengthen your risk mitigation strategy and build a complete account holder profile or related User Scoring Model. Based on banking history, unique deposit habits, industry lists like OFAC, and other business rules, use this score to streamline user experiences across all capture points.

Alogent Shield+

For financial institutions aiming to strengthen their fraud prevention strategy, Alogent Shield+ delivers all the powerful features of Alogent Shield and extends protection even further—across every deposit channel and the back office. Built on the same trusted foundation, Alogent Shield+ elevates fraud mitigation with AI, computer vision, and industry-wide consortium data, providing next-generation defense against check fraud throughout Day 1 and Day 2 processing workflows.

Alogent Shield+ also brings real-time, Day Zero decisioning to the point of capture. By analyzing checks immediately—before they enter downstream processes—institutions can intercept fraudulent items at the earliest possible moment. Leveraging the consortium's shared intelligence, this analysis drives faster, more accurate decisions, reducing risk exposure and reinforcing overall fraud defenses.

ENTERPRISE CONTENT & LOAN MANAGEMENT SUITE

Content and Information Management

FASTdocs

Go beyond legacy document repositories with FASTdocs, Alogent's web-based ECM platform that's built for banks and credit unions. Easily digitize, index, store, and manage documents while increasing access for front-line and back-office staff. Simplify document routing, approvals, and notifications with workflows. Empower customers, members, and staff through self-service.

Loan Management & Exception Tracking

AccuAccount

Streamline commercial lending from application through servicing with AccuAccount, our core-integrated document management system used by 32,000+ bankers. Increase productivity with intuitive exception tracking and reporting, audit preparation, and document retention. Enable enhanced lending experiences by gaining a comprehensive view of each relationship.

Alogent provides proven, end-to-end check payment processing, and enterprise content, information management, and loan management platforms to financial institutions of all sizes, including credit unions, community banks, and some of the largest national and international institutions. Our unique approach spans the entire transaction ecosystem — capturing and digitizing transaction data, mitigating fraud, and automating entire workflows so that information is available across the enterprise. Alogent's solution suites leverage the latest in AI, machine learning and predictive analytics, including enterprise-wide data intelligence and reporting solutions that enable financial institutions to deliver products and services that boost engagement through personalization and data-backed decisions.
